LANDCARE

Cultivating Success

Our Landcare program was nominated for the nationally acclaimed '2015 Banksia Sustainability Awards'. Mirboo North Secondary College won the prestigious 'Environmental Ministers for a cleaner environment' division against some fierce competition.

Lead by passionate staff and students Mirboo North Secondary College began to propagate their own native trees and plants suitable for their local environment. Utilising the local Landcare community which supported our initiative we were able to supply them with initially 10,000 trees then 10,000 every year after. Then students help to revegetate their local environment with mass plantings to ensure our community is greener for the next generation to come.

Mirboo North Landcare trees and services are highly in demand in the local community and equipped with a lunchtime enviro team the future of our local environment couldn't be in safer hands.
