LANGUAGE

Why learn a language?

Learning a language is vital for any countries standing in the world, as languages play an important role in the country's trade, culture, diplomacy and national security. Research shows that students that learn a language have a 94% chance of gaining employment within 6 months, as language skills are in high demand.

Studying a language is more than just gaining a qualification. Speaking a foreign language is a life skill that improves your brain functionality. It also improves communication skills, increases cultural awareness and improves many travel opportunities.
